

Beauty Skin

- Highly effective for cosmetic treatment of such skin disorders as acne or comedones
- No application of aggressive chemicals necessary
- Use of positive effects of natural light with specific wave length
- Unique combination of special blue and red light constitutes the basis of the Beauty Skin system
- Blue light penetrates the skin and reaches the harmful bacteria and thus helps to prevent the further development of acne and comedones
- Red light has a positive effect by skin inflammation (dermatitis), soothes and stimulates the skin
- UV-free light
- Includes protective glass front
- Positive effect can be reached already by 15 minutes per day treatment: healthy skin for more self-confidence and well-being.

MADE IN GERMANY

The power of the natural light

Beauty Skin uses the natural light with two precise wave lengths that lay in the upper and lower spectre of the visible light.
